Olan Mills can help...

New from The Olan Mills Church Partnership is the My Family Page Bio Directory, the answer to a more personal, more social and more relevant church pictorial directory. With the new My Family Page Bio Directory, each family has a page of their own to share what is meaningful to them: ministries, children, hobbies, work, etc. This new directory can help personalize your church family to the community, connect church members to each other and encourage participation within the church.

And just like all Olan Mills directory programs in the past, this sensational new directory format is free to your church and free to participating families.

Be the first to create
your Family Page
directory.
